MEMORY CHARM

A small object that holds a moment.

TAP YOUR PHONE TO BEGIN.

AWAKENING

First, confirm NFC is on.
Open Settings, search for *NFC*, and switch it on if it is not already.

Then find where it wakes.
On *iPhone*, that place lives along the top center edge.
On *Android*, it should be in the upper half of the back — usually near the camera.

Hold the charm there. Move slowly.
When you find the right place, your phone will know.

A single tap is all it takes.
No app to install.
No pairing.
Just tap, and the journey starts.

BINDING

A guide will open. You will be asked to shape the memory:

— Create a Keeper account
— Accept the Memory Charm license
— Choose a memory — video, photo, or audio
— Give it a title and a short description
— Set how it may be shared
— Seal the charm

For the first fourteen days,
the memory stays soft — editable, still taking shape.

After that, it settles into its final form —
a story, ready to be told.
